

**A BST Seminar
On Creating an Injury-Free Culture**

Leading With Safety

**Birchwood Hotel and Conference Centre,
Near O.R. Tambo International Airport
19-20 October 2010**

Leading to an Injury Free Culture

Years of experience helping clients implement employee-driven systems have shown us that leadership behaviour is one of the most critical factors in the success of safety initiatives. The reason is that leaders, through what they choose to focus on and how they go about doing the things they do, significantly impact the organisational culture that drives performance.

Best Practices

Organisational culture is the hidden factor that drives safety performance. Sites with identical safety initiatives – but with different levels of trust, communication, and management credibility – have vastly different end results. Research shows that a difference in key organisational characteristics can make all the difference in the success of safety and other performance initiatives.

Getting from *What* to *How*

The Leading with Safety seminar is designed for anyone who wants to take safety performance to the next level – and build a foundation for far-reaching organisational excellence. Learn what characteristics your organisation needs to develop to become high-performing, why leadership is integral to developing that culture, and the concrete steps forward to an organisation that truly leads with safety.

Charting new Directions in Safety Improvement

Attend this seminar and find out how leading companies are creating and sustaining change by:

- Harnessing the power of leadership.
- Using safety as a foundation for excellence.
- Leading with Safety to greater overall performance as an organisation.

Seminar Content:

Why Lead with Safety?

- Why it is essential to move the focus of safety activities beyond mere compliance, and what it means to be a safety leader.
- How safety is foundational to a high performance culture.

Understanding Organisational Safety Culture

- The link between leadership activities and organisation culture.
- How to focus leadership actions to influence activities on the floor.
- The nine organisational characteristics scientifically linked to performance outcomes.

The Difference between Leadership and Management

- The importance of both leadership and management activities and where to focus them.
- Developing leadership practices that fuel culture change.

The Role of Applied Behaviour Analysis

- The fundamentals and use of applied behaviour analysis to understanding why people do what they do and to develop effective change strategies.

Defining the Gap – Where are you now and where do you want to be?

- How to assess your existing safety culture and to generate motivation, information, and accountability throughout each level of the organization to address challenges to safety excellence.

Best Practices for Developing Safety Leadership Excellence

- The essential elements of safety success and how to measure them.
- Engaging front-line employees and supervisors effectively.

Developing a Strategy

- Considerations for the development of an optimal strategy.

Who should attend:

Anyone from any level in the organisation who wants to increase the efficiency and effectiveness of their existing safety efforts through understanding and **building** on the crucial roles of leadership and engagement.

“A must for any leader who wants to create an injury-free culture” Chris Beetge, Sasol Polymers

Leading with Safety

Seminar Registration Form 19-20 October 2010

	First delegate	Additional delegates*
